

Post Graduate Masterclasses

Post Graduate Training

2021

The Netherlands Institute of Core Energetics and Córpor Core Energetica Mexico cooperate in offering a new series of Post Graduate Modules.

You can participate in one or more of the **masterclasses** with the aim of becoming a **better therapist** and to have a **deeper understanding** of the themes you can offer. Or you can make it a **Post Graduate Program** by joining five modules and doing a final project. You can compose your training by choosing modules offered by NICE and modules offered by Córpor.

Besides developing your therapist skills, the Post Graduate program has the aim to **teach you how to teach**. You will practice teaching by working (under supervision) with the whole community. After doing this program you are able to serve as an assistant in the Core training program and to make your first steps to find out if you want to become a trainer. attitude towards frustration and being willing to risk exposure and criticism.
