

# CORE ENERGETICS

## Postgraduate Training and Masterclasses 2022-2023

# FUTURE LEADERS, FUTURE TEACHERS

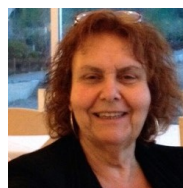

The Netherlands Institute of Core Energetics offers a new series of postgraduate modules.

You can participate in one or more of the **masterclasses** with the aim of becoming a **better therapist** and to have a **deeper understanding** of the themes you can offer. Or you can make it a **Postgraduate Program** by joining all modules and doing a final project.

Besides developing your therapist skills, the Post Graduate Program has the aim to **teach you how to teach**. You will practice teaching by working (under supervision) with the whole community. After doing this program you are able to serve as an assistant in the Core Energetics training program and make your first steps to find out if you want to become a teacher.

In each of the training modules you practice leadership qualities: taking risks, serving, tolerating negative transference, dealing with conflict, using your full potential and creativity, unselfish giving, maintaining proper attitude towards frustration and being willing to risk exposure and criticism.
