

International Supervision Intensive December 2 - 5, 2022

“Moving into the unknown”

Going to an unknown place as a therapist is very challenging. You will be confronted with resistance and the unconscious process of our clients.

But the more risks you are willing to take, the more you will help your clients to take risks for themselves. This will take the work to a deeper level which is in the benefit of the client.

For all kind of Body-Psychotherapy modalities NICE offers a supervision intensive.

This Supervision intensive will offer a loving and supportive space so participants will feel more courageous in making new steps and taking risks as practitioners in their practice. For every change there will be resistance and perceived danger and therefore fear. This is something we experience as human beings. It exists as long as we do. The question is: can you hold and contain your fear and use that energy in a more exciting and creative way.

For whom

This Supervision Intensive is designed for certified body-oriented psychotherapists with at least one year of clinical experience, who want to participate in an exchange with other therapists.

The program

We will work for four days and do sessions with each other and be supervised. We will also bring clients from outside to have a new experience. If you have specific wishes or questions please make them clear in the enrollment form.

When

December 2 - 5, 2022

Start: Friday 10 am

Ending: Monday 5 pm

Anna Timmermans and Warren Moe

Anna and Warren are passionate Core therapists and trainers with more than 30 years of experience. Warren has been the director of New York Institute and Anna is the academic director of NICE. Together they have facilitated workshops and taught numerous classes together as co-leaders.

Currently they have created a program to train Core therapists to become supervisors for institute students. This program will be offered to qualified Core practitioners next year.
